(54) CAPILLARY
ELECTROPHORETIC CHIP

(57) Abstract:

PURPOSE: To improve the operability of a capillary electrophoretic chip.

CONSTITUTION: A thin film electrode 27 for connecting each reservoir 23 electrically with the outer circumferential side face of a chip body 11 is formed on a transparent plate. The chip 1 is surrounded by a frame 12 made of

insulating material and a connector 14 is provided on the outside thereof. Each thin film electrode 27 and each terminal 15 of the connector 14 are connected through lead wires 16 with inner contact electrode parts 13.
